**Student Software Developer**

**March 2019 - Present**

**Rexburg, ID**

- Selected to be a part of the Student Leadership Council to help identify and implement programs to help student employees become better leaders
- Develop and maintain the JavaScript and CSS for the Canvas LMS to create custom web features to facilitate a consistent look and feel across 400 courses for the students and faculty
- Contributed to the design of an audit program that will scrape all courses for specific parameters such as student/teacher enrollments, proper groups setup, and course content copied correctly
- Redesign and maintain a web application to track the progress of thousands of video and audio transcripts.
- Assisted in the transition of hundreds of courses not previously transitioned from D2L Brightspace to Instructure Canvas LMS
